EDUCATION

Indian Institute of Information Technology, Kota **2024 – 2028**
B.Tech in Artificial Intelligence and Data Engineering *CGPA: 5.82*

Mittal International School, Kota **2021 – 2023**
Secondary and Senior Secondary Education (PCM) *70.8%*

TECHNICAL SKILLS

- **Programming:** Python, C, C++
- **Data Management & Analysis:** SQL, MySQL, Pandas, NumPy
- **Data Visualization:** Tableau, Matplotlib
- **Tools & Frameworks:** Git, GitHub, VS Code, Streamlit, FastAPI
- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Operating Systems, Machine Learning, Deep Learning, Computer Networks

PROJECTS

L-Net: Lightweight CNN for Plant Disease Detection *Academic ML/DL Project*
Technologies: Python, TensorFlow, CNN, Deep Learning

- Developed L-Net, a custom lightweight CNN architecture using depthwise separable convolutions for multi-crop plant leaf disease classification (apple, bell pepper, and grape).
- Applied an ensemble activation function, plant-wise dataset splitting, extensive image augmentation (55K+ images), and a Modified Adamax optimizer.
- Achieved 99.8% accuracy, 99.7% precision, 99.3% recall, 99.5% F1-score, and 1.00 AUC with approximately 167K parameters.
- Designed for resource-constrained edge devices such as Raspberry Pi, targeting real-time offline plant disease diagnosis.

Fake News Detection Using NLP *College Team Project – In Progress*
Technologies: Python, NLP, Scikit-learn, TF-IDF, FastAPI, Streamlit

- Developing a machine learning pipeline to classify news articles as likely real or fake using natural language processing techniques.
- Implementing text preprocessing and TF-IDF feature extraction with unigram and bigram features.
- Working with Logistic Regression, Multinomial Naive Bayes, and Linear SVM models for classification and performance comparison.
- Developing a Streamlit interface and FastAPI backend for model predictions.

ACHIEVEMENTS & ACTIVITIES

- **Athletics:** Active member of the college athletics team, focusing on 200m and 400m sprint events, with consistent participation in track training and practice.
- **Problem Solving:** Started building algorithmic problem-solving skills by practising at least one problem daily on coding platforms such as LeetCode and GeeksforGeeks.
